Retractable, Rotating Monitor

“What is ROTATIS?”

Within ROTATIS rests a retractable monitor whose display can be either in the upright position constantly or closed over for later retraction, in a circular turntable.

This is incorporated into the furniture surface via a separate frame, allowing for the entire construction to be contained in a single piece, requiring no further adjustment externally. Allows the rotation of the rotation of the monitor to 350°. Its ideal for use where multiple users at a time should see content on the screen or where a single user inputs data then rotates the screen for verification & authentication

A design first & fully customisable.
Often Copied - Never Equalled.
