

MODERN AND ELEGANT SHAPE  
EVEN IN IP65 VERSION

Ticinque begHELLi IP65 is a product with a high aesthetic quality. The compact and innovative design, the reduced height, the sober and elegant shapes follow the BegHELLi stylistic lines. Ticinque begHELLi is

a very versatile product, which can be installed even in complex architectonic installations thanks to its simple and modern lines.

32 LEDs FOR A BETTER LIGHT DIFFUSION

With a thickness of 4.5 cm,  
it is the thinnest IP65 emergency fixture  
on the market

Accessories to be ordered separately

Order code	Description
11582	TICINQUE Emergency screen EXIT
11583	TICINQUE Emergency screen L
11584	TICINQUE Emergency screen R
11585	TICINQUE Emergency screen LOW

Accessories Included

Order code	Description
-	2 pcs connectors with IP plug

IP42

Order code	Description	W	Battery	Version	Autonomy
8584	TICINQUE IP42 LED 18WSE8P	18	Pb 6V 4Ah	SE	8h
8585	TICINQUE IP42 LED 18WSA8P	18	Pb 6V 4Ah	SA	8h

IP65

Order code	Description	W	Battery	Version	Autonomy
8586	TICINQUE IP65 LED 18WSE8P	18	Pb 6V 4Ah	SE	8h
8587	TICINQUE IP65 LED 18WSA8P	18	Pb 6V 4Ah	SA	8h

Power * W	• Dimensions (mm) • L B H	Number of LED	Weight kg
18	549 147 43	32	1,8

\* Indicative power for fluorescent tube comparison

CEILING INSTALLATION

WALL INSTALLATION

INVISIBLE CONNECTOR

- 2 pcs of invisible connectors Included

IP PLUG WIRING MEMBRANE

- 2 pcs of IP plug membrane Included

UNIVERSAL INSTALLATION THANKS TO THE IP PLUG SYSTEM WITH FAST CONNECTOR

Ticinque led is based on three main concepts: high features, modern and elegant shape, fast installation. With reference to this last point, BegHELLi has improved the mounting system in order to simplify the job of installers.

The housing of the product has multiple ways to connect the input mains in order to accede in a "hidden" way to the electronic parts, in case of tubes recessed in the wall, using the back input, as well as in case of external wires without using any extra accessory.

The included IP plug system is a special membrane which can be inserted in one of the 4 input slots located on the sides of the product.

This patented system has been designed to speed the wiring operations guaranteeing anyway the IP protection degree in any type of installation.

In case of spiral conduit or 16/20 mm diameter tube, an "invisible" connector (included) acts as a junction between the tube and the IP plug membrane.

Otherwise, In case of direct input with double insulation cable, the "invisible" connector is not needed: to achieve the IP protection

degree, it is enough to insert the cable directly in the IP plug membrane, which acts as a normal conduit fitting granting the correct protection level.

VERY HIGH LUMINOUS EFFICIENCY  
WITH 8 HOURS AUTONOMY

BegHELLi Ticinque LED, with its small dimensions, is the perfect solution for any type of installation in industrial as well as in tertiary sector locations.

The high reflection symmetric optic, combined with 32 high efficiency LED, ensures an high luminous efficiency on the work plane. The reflector shape has been designed to avoid any glare and thanks to its patented geometry it is possible to have a luminous beam suitable both for ceiling and wall installations.

The 8 hours autonomy of this product makes it one of the best luminaires of its category. Moreover, thanks to the compact and strong structure available also in IP65 version, Ticinque LED is particularly suitable even in industrial installations.
