## DESCRIPTION

The iDX 120 iE in-ear headphone features a powerful yet balanced sound. The metal housing with anodised surfaces and sturdy TPE material represents a solid, rugged design. The iDX 120 iE especially connects to Apple devices such as iPod, iPhone or iPad. With the 3-button remote control you can control the media playback of your player as well as phone calls. Volume up and down is only possible with Apple devices. Two extension cables are included which allow the player to be easily placed in a trouser or jacket pocket. One of the two cables can be connected to devices with pinout incompatible to the Apple standard. Due to the flat shape the cable does not tangle up. The large choice of supplied eartips in different sizes ensures a perfect fit so that the iDX 120 iE meets all demands regarding comfort, ambient noise attenuation and deep bass response. The supplied adapter allows connecting a second headphone to share music with friends.
